HALF-FULL REPORT 07/25/25

Welcome to the Stupefaction HFR. We're six months into Trump's Second Presidency as of last Sunday (7/20/25) and it's nothing short of outright stupefying. POTUS and his entire White House have every right to strut, preen, and engage in hyperbolic pride.

And it's all so scrumptiously Schadenfreudelicious how the Democrats and Woke Left are in a dark abyss of hopeless bitterness over it.

So let's enjoy being stupefied as we recount how the winning has continued this week. We'll start with Tulsi and a deeper dive into Obama's Russia Collusion Hoax. You'll have a reminder of who enabled the hoax, a name not mentioned yet but soon to be for his cowardly betrayal. And another of a Democrat murderer who played a key role in the hoax.

We have a lot of ground to cover, so get comfortable with your favorite adult beverage at the ready. Here we go.

****

On Wednesday (7/23) at the White House press conference, Karoline Leavitt, in introducing Tulsi Gabbard, had this to say:

> Barack Obama went to great and nefarious lengths to try to thwart the will of the people and sabotage his successor – President Trump.
>
> It's one of the greatest political scandals in American history.
>
> The truth is that President Trump never had anything to do with Russia, and… pic.twitter.com/0GqCkjXuiR

> — Karoline Leavitt (@PressSec) July 23, 2025

Tulsi then announced her declassification of a 2020 House Intelligence Committee Report (link is to full text) that provided "irrefutable evidence" of a "treasonous conspiracy" by Obama, Comey, Brennan, and Clapper to de-legitimize Trump's 2016 election in the months prior to his January 20 Inauguration (i.e., while Obama was still President).

But why and how was this report not made public and classified instead in the first place? *Because Democrat Adam Schiff was chairman of the House Intelligence Committee and immediately ordered the report to be classified and hidden away in a vault at CIA Langley.*

It took DCI Radcliffe and DNI Gabbard months of digging to discover and ferret the hidden report out. Fox's legal analyst Gregg Jarrett's briefing on how Obama-Brennan created the Russia Hoax is a must-read.

But here's another question. Tulsi stated the Obama-Brennan Russia Hoax "launched a years-long coup against him (President Trump) and his Administration." How did *that* happen?

****

Remember this cowardly gutless twerp? Yes, it's Jeff Sessions, confirmed by the Senate on February 8, 2017 as Trump's Attorney General who exactly 25 days later caved and capitulated to the Dems and their media foaming at the mouth over their Russia hoax.

On March 2 he recused himself from any DOJ involvement "in any existing or future investigations of any matters related in any way to the campaigns for President of the United States."

Obama and his cabal committed treason against the United States. Sessions committed personal treason against Trump, a knife-in-the-back betrayal. When he met with Trump at Mar-a-Lago to explain his recusal, Trump angrily demanded he withdraw it. Sessions refused. POTUS should have fired him on the spot, replacing him with Rudy Giuliani, but didn't. Big mistake, Don.

Sessions thus allowed Deep State operative Rod Rosenstein as Deputy AG to appoint Robert

Mueller as Special Prosecutor, launching the “yearslong coup” Gabbard mentioned that lasted all through the rest of 2017, all of 2018, and well into 2019.

And all for nought. Imagine the bottomless dismay of the Dems, their media toadies, and Deep Staters when the word broke that Mueller couldn’t find any Russian dirt on Trump because there wasn’t any. The headline on March 25, 2019: Mueller Report: Trump Cleared Of Conspiring With Russia.

You know who this is, right? He’s Seth Rich, and the whole Russia-Trump Collusion Hoax begins with him.

In 2016, Seth was the senior data analyst at the Democrat National Committee headquarters in Washington DC. Hillary’s presidential campaign was being run there by John Podesta, her campaign chairman. Seth however was a big supporter of Bernie Sanders, and got increasingly infuriated at the DNC and Podesta were rigging the primaries against Bernie and for Hillary.

So much so that he surreptitiously inserted a thumb drive into Podesta's computer, downloaded tens of thousands of DNC emails many showing the rigging, and arranged to have them sent to Wikileaks founder Julian Assange. Podesta found out, and on July 10, 2016 while Seth was walking to his home in DC late at night, had him murdered, staging it as a robbery.

It wasn't. The police who took him to the hospital found neither his watch, wallet, money, credit cards, or phone had been stolen, they were still on him untouched. A doctor's report is chilling:

[Notes added:

* "post-surgery crit" is post-surgery critical care, referring to the patient's hematocrit level, i.e., the percentage of red blood cells circulating in the blood; "pressor" means "tending to increase blood pressure"; "LEOs" is law enforcement officers; "not to round" means not to make bedside visits.

* "No code was called" means no emergency alert was sounded for a cardiopulmonary

resuscitation team; “/pol/” refers to “politically incorrect” posts on *4chan*.

* “LR” is Lactated Ringers (solution), a common fluid replacement for patients who have lost blood or other body fluids; “PRBC” is packed red blood cells; “FFP” is fresh frozen plasma.]

WikiLeaks began releasing the DNC emails on July 22. To cover up Seth’s murder as the source of the leaks, Podesta dreamed up the claim that Russian government hackers hacked into his computer. He invented it whole cloth, further claiming the Russkies did so as they were trying to damage Hillary in order to help Trump.

This is still the lie today. See Wikipedia’s 2016 Democratic National Committee Email Leak. It’s a publicly known lie since 2017: NSA Experts Say DNC 'Hack' Was Actually a Leak and Inside Job. Their conclusion:

> *"The metadata established several facts in this regard with granular precision: On the evening of July 5, 2016, 1,976 megabytes of data were downloaded from the DNC's server. The operation took 87 seconds. This yields a transfer rate of 22.7 megabytes per second. These statistics are matters of record and essential to disproving the hack theory. No Internet service provider, such as a hacker would have had to use in mid-2016, was capable of downloading data at this speed.*
>
> *A speed of 22.7 megabytes is simply unobtainable, especially if we are talking about a transoceanic data transfer. Transfer rates of 23 MB/s are not just highly unlikely, but effectively impossible to accomplish when communicating over the Internet at any significant distance. Further, local copy speeds are measured, demonstrating that 23 MB/s is a typical transfer rate when using a USB–2 flash device (thumb drive)."*

Seth Rich’s murder has never been investigated. Yet it started the whole Russia-Trump Collusion Hoax. At some point, Bondi and Patel have to order the investigation – maybe assign it to this announced yesterday (7/24): Bondi Forms ‘Strike Force’ to Investigate Gabbard’s Disclosures on Russia Collusion Hoax.

Jerry Lee had a whole lotta shakin' goin' on.. and this week, Team Trump had a whole lot of *winning* going on.

Winning: in the July 4 HFR, we noted how Trump's BBB allowing 100% expending for businesses would skyrocket the economy. On Tuesday (7/22) 18 days later:

Winning: On Monday (7/21), Border Czar Tom Homan announced: “Sanctuary cities are now our priority. We’re gonna flood the zone."

Winning: On Thursday (7/24), AG Bondi and Ed Sec McMahon announced Columbia University agrees to pay $221 million fine. Nazi “Pro-Palestine” hatred and discrimination against Jewish students is over.

Winning: On Tuesday (7/22), the New York Times is really bitter about**:** EPA Plan to End Its Ability to Fight Climate Change. What they mean is EPA Director Lee Zeldin: EPA To Remove "Greenhouse Gases" From List Of Dangerous Pollutants.

This is Big. The whole Woketard Left argument for “climate change” as a rationale for controlling everyone’s life and business is human-caused CO2 causing global warming. The Zeldin article is a must read. Here’s one example. Atmospheric CO2 is now the lowest in 600 million years.

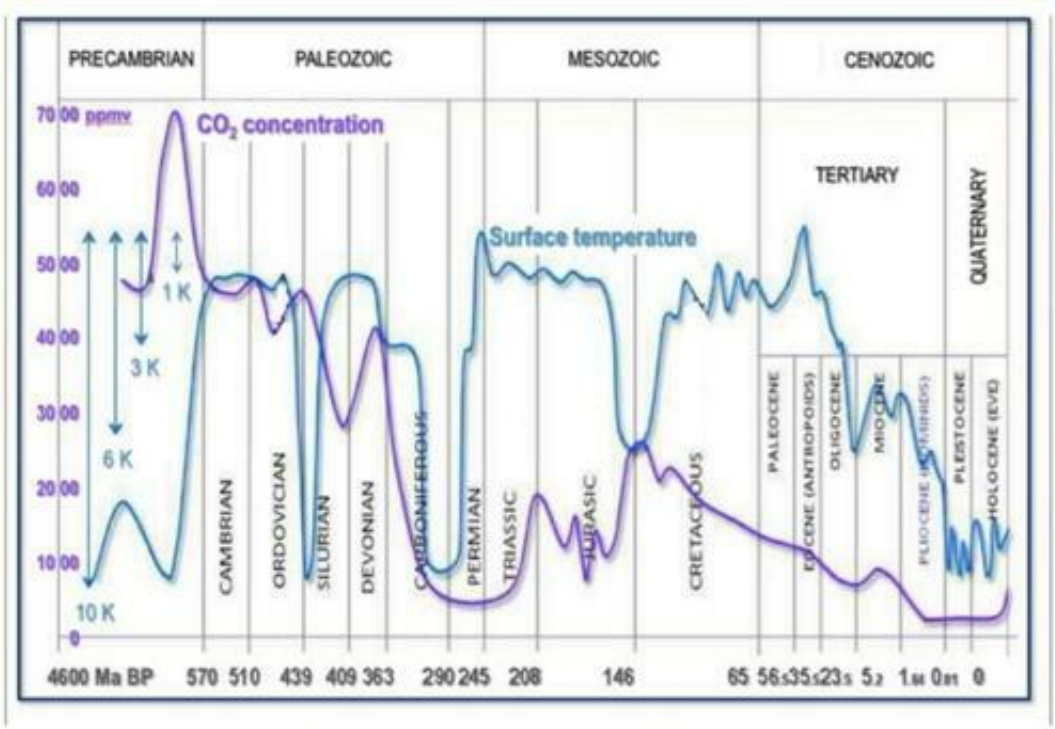

Figure 1. Graph of global temperature and atmospheric CO_2 concentration over the past 600 million years. Note both temperature and CO_2 are lower today than they have been during most of the era of modern life on Earth since the Cambrian Period. Also, note that this does not indicate a lock-step cause-effect relationship between the two parameters.[5]

Winning on Steroids: On Tuesday (7/22): Trump’s 3 trade in one day - deals with Japan, Philippines, Indonesia.

President Ferdinand Marcos, of the Philippines, is just leaving the White House, with all of his many Representatives. It was a beautiful visit, and we concluded our Trade Deal, whereby The Philippines is going OPEN MARKET with the United States, and ZERO Tariffs. The Philippines will pay a 19% Tariff. In addition, we will work together Militarily. It was a Great Honor to be with the President. He is Highly Respected in his Country, as he should be. He is also a very good, and tough, negotiator. We extend our warmest regards to the wonderful people of The Philippines!

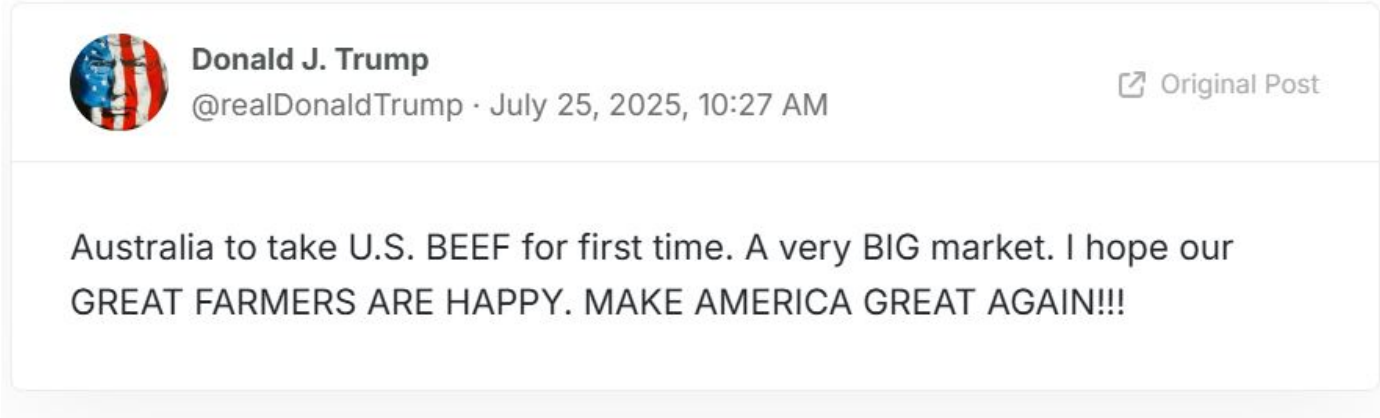
It is my Great Honor to announce our Trade Agreement with the Republic of Indonesia, as represented by their Highly Respected President, Prabowo Subianto. It is agreed that Indonesia will be Open Market to American Industrial and Tech Products, and Agricultural Goods, by eliminating 99% of their Tariff Barriers. The United States of America will now sell American Made products to Indonesia at a Tariff Rate of ZERO, while Indonesia will pay 19% on all of their products coming into the U.S.A. — The Best Market in the World! In addition, Indonesia will supply the United States with their precious Critical Minerals, as well as sign BIG Deals, worth Tens of Billions of Dollars, to purchase Boeing Aircraft, American Farm products, and American Energy. This Deal is a HUGE WIN for our Automakers, Tech Companies, Workers, Farmers, Ranchers, and Manufacturers. Thank you for your attention to this matter. MAKE AMERICA GREAT AGAIN!

Hard to get more stupefying than that. Fox business analyst Charles Payne predicts “Three trade deals in one day will generate trillions for America.” Watch – although, truth told, no white guy could get away with Charles’ canary yellow suit.

And there’s an encore today (7/25):



No wonder the stock markets and economic optimism are soaring. Tired of winning yet?

That's a wrap. Let's close with an ode to an extraordinary American beloved by millions. When Donald Trump was told of Hulk Hogan's death yesterday (7/24) while giving a talk, he cried and could hardly continue. We all remember his electrifying address at the RNC nominating convention last July. Let's relive that moment now. RIP Hulk.

> RIP to the great Hulk Hogan, who lived right here in FL-13. It was an honor to be your Representative. Gone, but the legend of Hulkamania will run wild forever. pic.twitter.com/SlPwjmLb7X
