HALF-FULL REPORT 03/13/20

We've known, or at least suspected, this for a long time. This is the week those suspicions were confirmed beyond any reasonable doubt.

On Wednesday evening (3/11), President Trump addressed the nation in calm and straightforward terms about the Wuhan Virus. At the close, he made a passionate heartfelt plea:

"We are all in this together. We must put politics aside, stop the partisanship, and unify together as one nation and one family."

Who of right mind and moral decency could not agree? The leaders of the Democrat Party, that's who.

Immediately the next day:

Joe Biden Uses Coronavirus Address to Lob Political Shots at Trump

Hillary Takes Aim at Trump over Coronavirus Response

Sanders slams "incompetence and recklessness" of Trump's coronavirus response

Three examples of many. Worse are Dems taking the side of Communist China which is currently

embarked on a massive worldwide propaganda campaign bribing journalists everywhere to report America is to blame for their killer virus.

Biden Calls Trump Racist For Stating The Fact That Wuhan Virus Began In China

The Democrat Party has swung so radically left and has become so mortally infected with its self-administered Trump Derangement Virus it has become the AINO Party, the Ainocrats, Americans In Name Only. They are rooting for the Wuhan Virus (wags now call it the WuFlu) to destroy the US economy so it will destroy Trump in November.

****

They are a party of Hate America Scumtards, with a senile buffoon corrupt crook as their poster child. You've seen his latest campaign ad?

And memes on him that have gone social media viral?

In fact, other than what TTPer Brant calls “the greatest worldwide hysteria of all time,” that of WuFlu, the biggest story of the week is the spotlight on Biden’s dementia.

The story has gone global. Watch as Rita Panahi of Sky News Australia recounts Biden’s long history of being mentally challenged, and ridicules the American media “who have for four years been declaring Donald Trump mentally and physically unfit for office, and have a collective meltdown when Biden’s mental faculties are questioned.”

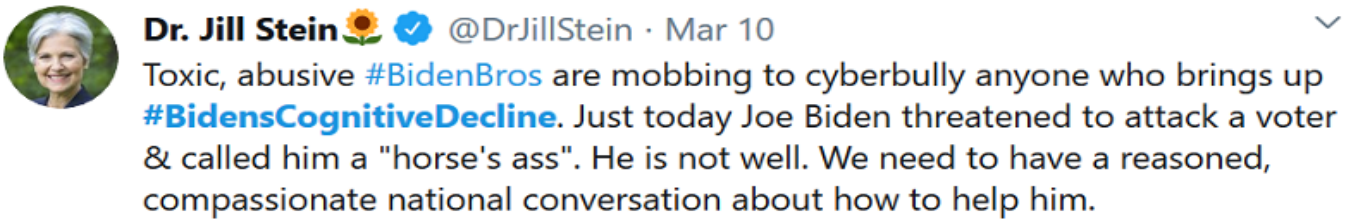
After reveling in clips of Biden unintelligibility, she asks, "*Now can you imagine that man in a presidential debate with Donald Trump? There's not enough popcorn in the world!*" Enjoy:

That was last Saturday (3/07). The very next day, on Sunday (3/08) in St. Louis, the man who the Democrat Party elite say should be the next President of the United States said:

"We cannot win this reelection… we can only reelect Donald Trump"

And on Tuesday (3/10) came the now-infamous episode of Biden exploding in rage at a union hard-hat auto worker in Detroit, telling him "You're full of s***," calling him "a horse's ass," saying he wants to take him outside and slap his face.

No wonder *#BidensCognitiveDecline* is hotly trending on Twitter now – and is being deluged with rabid Dementia Joe defenders.



Biden's supporters are becoming just as abusively deranged as he is. For they are just as totalitarian fascist as he is.

MemeMaster Carpe Donktum released on Wednesday a devastation of this disgusting man. It's less than 2 minutes. Please consider sending the link -- https://www.youtube.com/watch?v=jyFQYWCLC5E -- to everyone you know and ask they do the same.

****

Ronald Reagan was fond of telling a story as his example of unquenchable optimism. It was of a young boy on a farm happily digging through a huge pile of horse manure. When his father asked what he was doing, the boy cheerfully called out, "There's got to be a pony in here somewhere!"

Is there a pony to be found in this pile of pandemic lunacy about the WuFlu that's covering the

entire planet?

Let's skip the stats on China because Chicoms lie about everything as much as Democrats. So let's deduct the 80,815 supposed cases there from the world total of 144,026, which leaves 63,211. (All figures here as of 8pm GMT tonight, 3/13). And the 3,177 supposed total deaths in China from the world total of 5,397, which leaves 2,220 worldwide WuFlu deaths outside China.

That is a supposed death rate of 3.5%. However, it is turning out that the vast majority of cases go unreported as the symptoms are so mild people recover quickly, which drastically reduces the death rate.

We'll get back to that, but let's talk about Italy, #2 in infections and deaths after China. As of today, 17,660 cases reported, 1,266 deaths (250 in the last 48 hours), a horrific death rate of over 7%. What is going on in Italy?

First, any observer of human behavior who has spent time in Italy knows that Italians have a compulsion to touch each other, embrace each other, talk to each other inches away. They have a compulsion for close personal proximity that other cultures would feel is an invasion of personal space. That's the way Italians are, which is fine, even endearing, unless you're transmitting deadly viruses.

This is the primary reason for the epidemic spread of WuFlu in Italy. What kicked it off, by the way, is the 300,000 Chinese in Milan.

Second is the Bernie Sanders socialist medical care in Italy, which is utterly overloaded and has to ration medical care.

Third is the EU bureaucrats in Brussels screwing Italy so badly that Italians say EU Stands for "Europeans Useless."

It's a lethal combo of culture, no private medical care backup, and EU backstabbing that's causing this horrific tragedy. Italy has to be quarantined from the world until the WuFlu dies out along with ghastly numbers of (mostly elderly) Italians.

Then we have Iran, with 11,364 cases and 514 deaths – reported by the Islamofascist mullahs whom you can't trust anymore than Chicoms or Dems. Satellite images of mass graves for WuFlu deaths show how much they are lying.

Iranians have a compulsion to pack themselves into Shia shrines, breathing, coughing, and sneezing all over each other worse than Italians, and won't stop doing so. Again, it's a culture obsession that's doing them in.

Next on the death list is Spain, 4,334 cases, 122 deaths. Spain has a proximity culture too but not nearly as bad as Italy's – they still have a compulsion to double-kiss each other on the cheek, and they have an overload of sick and elderly.

If we delete these death outbreaks in Italy, Iran, and Spain from the 2,220 deaths outside China (-1266, -514, -122 respectively), you're left with 318 deaths for the entire rest of the world and its remaining 191 (out of 195) countries.

Please scroll down this list of Confirmed Cases and Deaths by Country, Territory, or Conveyance. The more you scroll down, the more you encounter countries with deaths in single digits. In fact there are many more countries with no deaths at all than with them (and most of the latter in low single digits).

In all of India with its 1.3 billion people, there is now 1 death, an 80 year-old who just came back from Italy. In all Sub-Saharan Africa with its over 1 billion people, not one single death.

And what about the United States? Of the 41 total deaths so far, 31 have died in nursing homes in Washington State, 30 of whom in nursing homes in two adjoining counties, King and Snohomish. This is a state nursing home scandal. Outside of that, 10 people (again mostly elder with conditions like heart disease or diabetes) have died out of 330 million.

Meanwhile, 20,000 people have died in America from regular influenza this flu season as February 29.

> *"CDC estimates that so far this season there have been at least 34 million flu illnesses, 350,000 hospitalizations and 20,000 deaths from flu, the CDC's Weekly U.S. Influenza Surveillance Report said."*

20,000 deaths versus 10 (or 41 if you prefer).

As this was being written, this afternoon (3/13) President Trump declared dealing with the Wuhan Virus to be a "National Emergency" under the Stafford Act, which is the statutory authority for "most federal disaster response activities."

It should help tamp down the hysteria that has gotten completely out of control.

****

So, where's the pony? Actually there's a small herd of them – the first of which being the tiny

global death rate outside the four countries discussed above.

Second is the timing. Markets were getting overheated, speculation everywhere that they were due for a big correction – needed to clear out the deadwood, allow for new growth.

Dems wanted this badly, hoping markets would crash by late summer-early fall, just in time to ruin Trump's best selling point, the economy. Sorry. The correction is underway, and will be done and dusted – along with the WuFlu – by the end of April, latest early May. More than enough time for the economy to be back steaming down the tracks well before Election Day.

Third is the end of supply-chain dependence on China for anything. Whether it's pharmaceuticals, rare-earth metals, whatever, the WuFlu is an OMG wake-up alarm call to producers that making them in China is seriously sub-optimal. Made In America is back again big time.

Fourth is, not only has China's economy been crippled, but so has that of Russia's and Iran's. With oil now at $33 a barrel, Putin's economy goes into the toilet, and Iran's flows right into the sewer. Great opportunity for POTUS to get Pooty-poot to be a good little boy, and to promote an uprising of Iranians to get rid of the Mullah Regime once and for all.

****

Folks, that's a wrap. Buckle up, we're going to have to ride this mass hysteria out. Winter is ending, spring is arriving, it will be over by May Day. Enjoy your life, your friends, your loved ones. Celebrate St. Patrick's Day on Tuesday (3/17) over too may pints of Guinness with them. Life is good and will get better.
