THE LAND OF THE DRAGON'S BLOOD TREE

This is the Dragon's Blood Tree, *Dracaena cinnabari*. It can be found in only one place on earth, a remote island called a Lost World for its uniqueness, the "most alien-looking place on our planet."

Although it's known as the most alien, strangest, weirdest, and bizarre place you can go to, it's also completely safe and incredibly beautiful. Anybody who comes here returns saying, "You have to see it to believe it." What is this place?

It's the World Heritage Site of the island of Socotra, the "Galapagos of the Indian Ocean," 240 miles off the coast of Yemen and now secured by the UAE. It's hidden, remote, and far away.

We were there in 2014, and it's been almost impossible to get to ever since. But we'll be back next April of 2021. Let me know if you'd like to be with us. *(Glimpses of Our Breathtaking World #34 Photo ©Jack Wheeler)*
