Gun Sanctuary Movement Erupts, 61% of US Counties Now Protect Second Amendment

You don't have to own a gun to be an enemy of the current DC government, If you are white, you have just become the US military's enemy. Of course, if you are white *and* own a gun, you are in deep kimchee.

Did you know that Jeff Bezos' Amazon Web Services is a very big buck CIA contractor? Yet the Washington Post never discloses this potential journalistic conflict of interest when it runs stories fed to it by the CIA and their minions. Behold the party of the Deep State; "The CIA Democrats in the 2020 elections":

The CIA Democrats in the 2020 elections

This is the first part of an extremely important article about why the Fed must continue to suppress interest rates. Interest rates are the most important price in the world because they are the price of time. Suppressing interest rates causes vast systemic malinvestments - and inflation.

To control the 1970s inflation, Fed Chairman Volker raised the Fed interest rate to 21%. It worked. It killed inflation at the cost of a short but severe recession. Note, however, that the Federalies' debts were far lower then. With the current Federalie debt of $28 trillion, annual interest costs at 21% would be over $5 trillion dollars, which is more than the total annual government tax take. Of course, the Fed could create that much money (or vastly more), but that would fuel double digit or greater inflation.

Did you know that the US Treasury has already borrowed and spent the Social Security Trust Fund? Did you know that the Fed has purchased 90% of all Treasury Bonds issued since March 2020 with newly created dollars? But wait next week for Part 2; it gets worse - much worse. The Fed is helpless to control the ongoing tsunami of inflation, so it will not be "temporary". The 'Crats are going to have a very ugly November 2022, and an even worse November 2024.

Desperate criminals do desperate things. Don't be where you might catch a stray bullet when that

happens. When the BLM types receive bread and circus payments that fall far behind rising prices, they will not react peacefully.

California, I'm glad I'm gone. You've bought a clean green expensive electric car. You've bought a clean green expensive home EV charging station to avoid long waits, even more expensive electricity, and battery life shortening fast charges at a daytime supercharging station.

Now, with less than 5% of California's cars electrified, the Ruling Authorities are telling you that you can't charge your EV at home after 6PM. California's grid doesn't have enough electricity. That is 2021; you'll love California even more in 2030.

Incidentally, guess what happens when the engine of a $50 million F-15 sucks in a thousand dollar kamikaze swarm drone carrying a one foot long piece if 1/2" diameter steel rebar... Are we going to have background checks for steel rebar? Drones? Only fools think that they can win the next war by using the last war's weapons.
