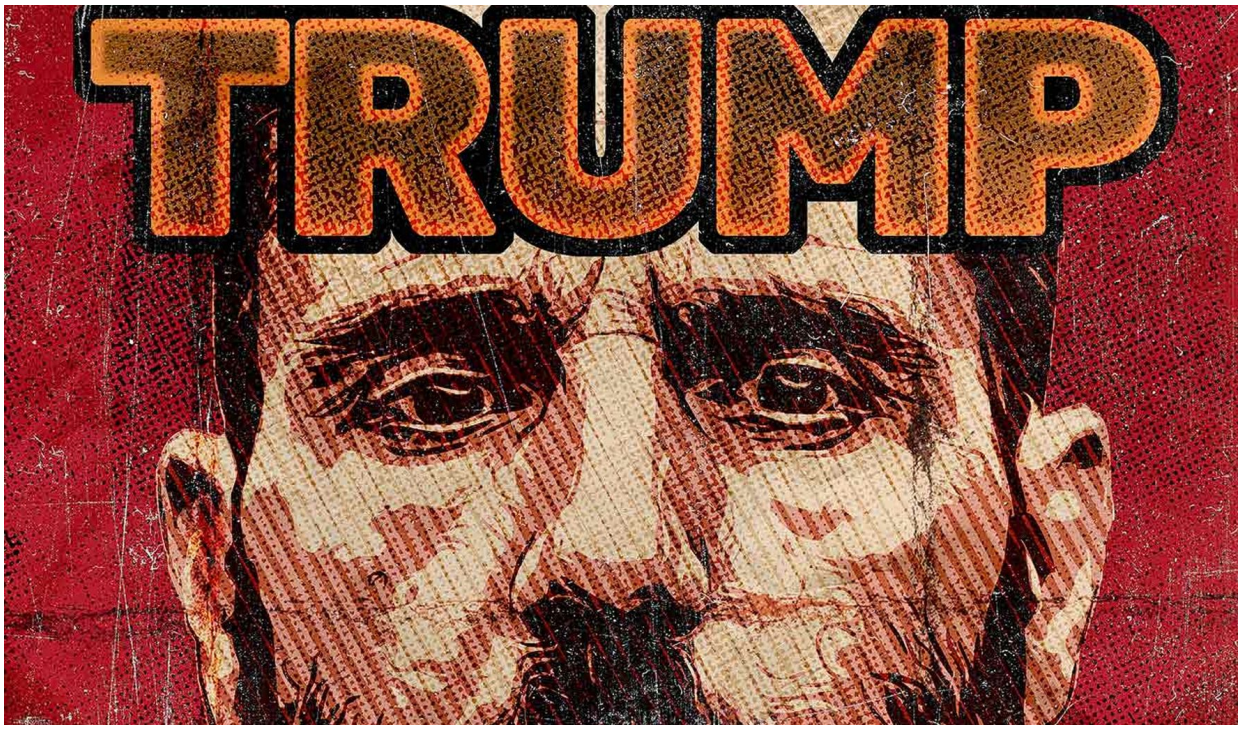
SKYE'S LINKS 06/27/24



Here is a fine article explaining why Jack Smith's appointment and prosecution of Trump in both the Mar-A-Largo and the J6 cases is unconstitutional, and then recaps the history of the 'Crat criminal lawfare election interference. I highly recommend this.

Arguments in U.S. District Court: Jack Smith Appointment as Special Counsel Unconstitutional

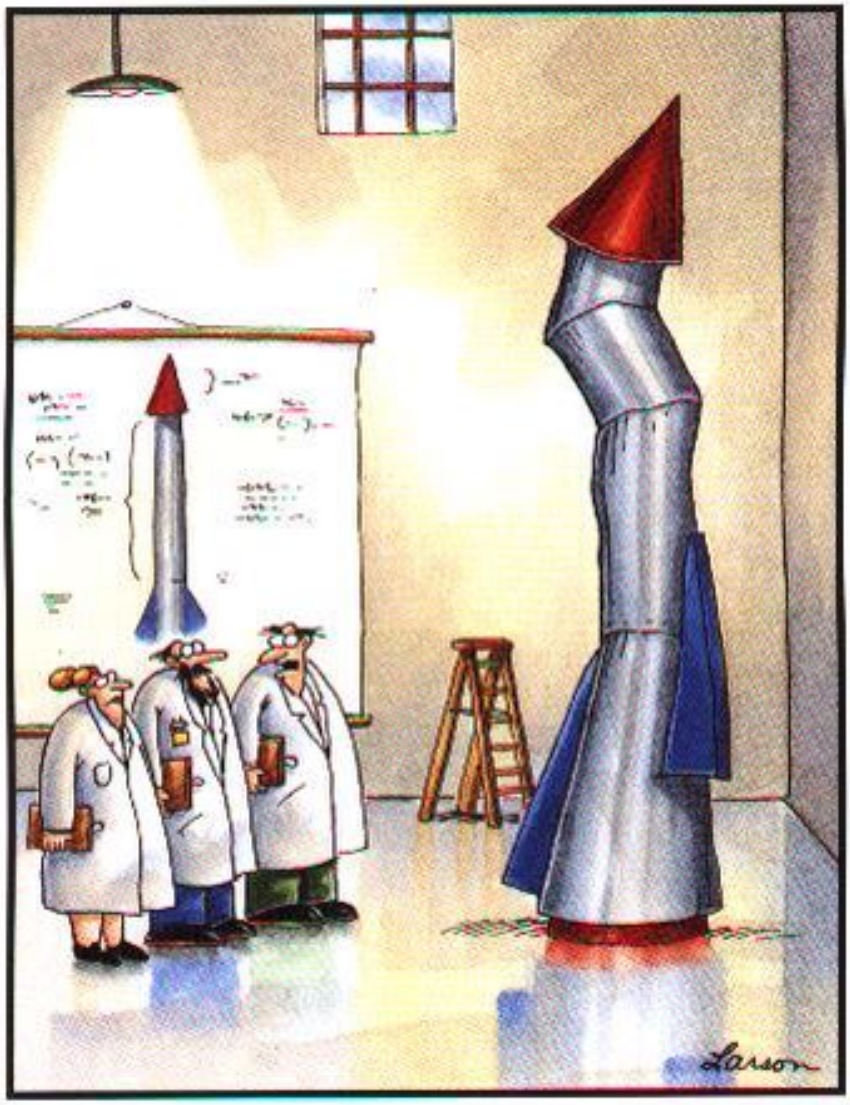
Why net zero by 2050 is impossible:

[Sorry Green Energy Fans, Net Zero Is a Very Unlikely Outcome]



"It's time we face reality, my friends. ...
We're not exactly rocket scientists."

The problems aren't just with the software and hardware in Boeing aircraft. I used a commercially available mass spectrometer helium leak detector half a century ago to precisely locate leaks in my rocket science research. That Boeing spacecraft never should have launched with those helium leaks. They should have been located and fixed before launch. Moreover, an investigation should have determined how those multiple leaks occurred and how those faulty parts got past Quality Assurance testing and were subsequently installed on a spacecraft. Boeing does not know how to do rocket science:
